### EMERGENCY AND FIRST AID PROCEDURES

INHALATION: No first aid is normally required. However, seek medical advise if any unusual symptoms develop.

INGESTION: Drink two or three cups of milk, fruit juice or water. No other first aid is normally required. However, seek medical advise if any unusual symptoms develop.

SKIN CONTACT: Remove contaminated clothing and cleanse skin thoroughly with soap and water. Seek medical attention if irritation, swelling, blistering or redness develop and persist.

EYE CONTACT: Holding the lids apart, flush contaminated eye(s) with a gentle stream of water for 15 minutes. If irritation or redness develop and persist, seek immediate medical attention.

## SECTION VIII - PRECAUTIONS FOR SAFE HANDLING AND USE

---

**STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:** Flush spilled material into suitable retaining areas or containers with large quantities of water. Small amounts of spilled material may be absorbed into an appropriate absorbent. Prevent spilled liquid from entering sewers, storm drains, and/or other unauthorized treatment/drainage systems and natural waterways.

**WASTE DISPOSAL METHOD:** In accordance with all Federal, State, and Local regulations. Refer to Section X. All waste material should be reviewed to determine the applicable hazards (testing may be necessary).

**PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING:** Keep product containers cool and dry and away from sources of ignition. Use and store this product with adequate ventilation. Keep product containers closed when not in use. Avoid subjecting this product to extreme temperature variations and freezing. Shocking the emulsion with large quantities of chemicals or extreme shear may cause coagulation.

**OTHER PRECAUTION:** In general, minimal health and safety hazards are expected from use of this product. When working with any chemical compound, prudent handling practices should be exercised and unnecessary exposure avoided. Launder saturated clothing before wearing.

## SECTION IX - CONTROL MEASURES

---

**RESPIRATORY PROTECTION:** (Specify Type) The use of respiratory protection depends on vapor concentration above the time-weighted TLV. Use a respirator/gas mask with appropriate cartridges and canister (NIOSH approved if available), or supplied air equipment, depending on airborne concentrations.

### VENTILATION

*LOCAL EXHAUST:* If general ventilation proves inadequate to maintain safe vapor concentrations supplemental local exhaust may be required.

*MECHANICAL (General):* May be sufficient to keep product vapor concentration within specified time-weighted TLV ranges.

**PROTECTIVE GLOVES:** Impervious

**EYE PROTECTION:** Chemical goggles

**OTHER PROTECTIVE CLOTHING OR EQUIPMENT:** Protective clothing is advised as good chemical handling practice. The availability of eye washes and safety showers in work areas is recommended.

**WORK/HYGIENIC PRACTICES:** Wash thoroughly after handling.
